Questions

- What are the key challenges and bottlenecks into integrating conservation/connectivity issues to infrastructure developments?
- What are the key policy developments at national/regional level that we can influence with our work?
- Who are the key stakeholders to address and the possible channels to address them in order to secure desired project outcomes?
- What tools would be the most useful to address these challenges?
- What kind of good examples/stories you have in terms of successful integration of conservation/connectivity issues into infrastructure developments?

Project co-funded by the European Regional Development Fund (ERDF).
