
CityWalk - ERDF project partner:

Municipality of Oradea

Oradea is a city located in the North-Western part of Romania, close to the border with Hungary. Acting as a capital of the Bihor County, Oradea has around 200.000 inhabitants and a rich history of centuries. Our city is well known in Romania for the fabulous architecture styles of the buildings especially from the central area of the Oradea.

The Municipality of Oradea, as partner in the present project, proposes the following pilot activities to achieve the goal purpose meaning increasing the role of more sustainable forms of mobility in the urban transport mix, especially active transport forms like walking. The elaboration of an integrated concept for extending the pedestrian areas in the city center will comprise the integrated documentation for designing of the transition of Aurel Lazar Street from road infrastructure to pedestrian zone for a length of approximatively 200 meters. Oradea also aims to implement on signposting at major city points to indicate major city touristic attractions and walking routes and time.
