1. Overview of national co-financing systems

Under the Danube Transnational Programme, projects are co-financed by ERDF and IPA Funds. **The co-financing rate per partner is 85%** for each ERDF and IPA partners. The remaining budget (15%) can be covered by the following sources:

- **State contribution** (where applicable) and/or
- Own sources (can be public or private) of the project participant and/or
- Other contribution (e.g. regional/local/other sources)

This document contains **summary information on the national co-financing systems** for the following reason:

State contribution has to be indicated in the Application Form only in case the Partner State provides national public contribution at state level for the projects selected by the Monitoring Committee, and therefore the amount is covered in total or partially by the state.

Please note, that this document is prepared only for information purposes and does not constitutes part of the relevant call for proposals.

For more detailed information on the national co-financing systems and rules to be applied at national level, the contact persons provided in the document or the National Contact Points (NCPs) should be contacted before submission of the Application Form.
