2. OVERVIEW OF THE IMPLEMENTATION OF THE COOPERATION PROGRAMME (Article 50(2) of Regulation (EU) No 1303/2013 and Article 14(3)(a) of Regulation (EU) No 1299/2013)

Key information on the implementation of the cooperation programme for the year concerned, including on financial instruments, with relation to the financial and indicator data.

The core objectives of the 2019 programme implementation have been successfully achieved, with the DTP continuing in the path of successful performance.

- The Moldovan management and control system received an unqualified opinion, allowing the designation of the first ENI country of the DTP
- The first call projects have all finished their implementation
- The third call proposals have been selected for the second step, whose assessment started already in December 2019.
- The second PAC call for proposals has been prepared, launched and decisions have been already taken by the MC.
- The concept of the second SMF call for proposals has been developed.

By the deadline of 15 February 2019, the "annual accounts" package prepared by the programme authorities in close cooperation (Audit Authority, Certifying Authority and MA/JS) had been submitted to the EC for the accounting year ended 30 June 2018. The annual accounts had been approved by the EC on 14 May 2019. Based on the expenditure included in payment applications submitted to the European Commission in the course of the accounting year 01/07/2018-30/06/2019, the Audit Authority selected the sample of operations to be audited and sent it to the GoA members for consultation purposes. Altogether 61 project partners have been selected for audit in order to gain comprehensive feedback regarding the implementation of projects within the Programme. The audits on operations were carried out by the External Auditor (AESA Hungary Ltd) from 24 July 2019 to 27 September 2019. Final audits reports had been issued by December 2019, except for one report which had been closed on 8th January 2020. In the audited period 24 irregularities were revealed regarding 15 beneficiaries. The total amount of these irregularities is 69 372.80€ out of which the amount not to be recovered and repaid into the EU budget (below 250€ contribution from the EU Funds) is 140.65€. Based on the Verification Reports submitted by the Partner States within the deadline of 15 October, as well as the results of the system audits and audits of sampled operations carried out, the MA/JS prepared the draft management declaration and annual summary for the year 2019. The final documents had been submitted to the AA in February 2020, after acceptance of the drafts by the AA.

Open questions related to reporting of ENI expenditure towards the EC had been discussed via videoconference in February 2019. Based on the result of the designation audit on compliance the management and control system (of the Audit Authority) of Moldova, with unqualified opinion, the MA/JS provided access to the eMS to the ENI-MD controllers and they started to validate the expenditure reported by the ENI-MD project partners. Out of the 4 corrective measures needed, the MD authorities reported 2 fulfilled in 2019. The designation audit for Ukraine resulted with qualified opinion, meaning that the national control system is not established yet and corrective measures needs to be fulfilled. Fulfilment of the corrective measures will be audited in 2020 with the involvement of the GoA members. Meetings with the MD and UA authorities and MA/JS took place in 2019 (February 2019, Chisinau and April 2019, Kiev) on the steps needed to finalise the designation process.

By the end of 2019, all 54 first call projects finalised their implementation. 12 projects have been also financially closed by December 2019. Fourteen final Project Progress Reports (PPRs) are expected to be submitted within April 2020. In the first half of 2019, 20 first call projects requested modifications (mainly two to six months prolongation of the duration aimed at properly implementing the activities and disseminating the achieved results, or partnership change due to withdrawal of a PP), as well as few second call projects (e.g.

partnership changes). The PPRs for both the first and second call projects were received in different periods, keeping constant the work of the MA/JS and the controllers: in February and August for the second call projects, and from April on for the first call projects. The first year review (FYR) of the 22 second call projects started in May and was finalised in November. No major findings were identified during the visits, which were mostly used to clarify doubts and settle certain management or financial issues.

The second PPR for the PAC projects was submitted in April and confirmed a low-spending trend which proved to be a common trend for PAC projects (with some exceptions). An analysis on the PAC reporting was prepared by the MA/JS and discussed during the MC meeting.

The DSP project submitted its first PPR in June and despite the expected inclusion of the Croatian EUSDR Presidency institution in the project, this modification request started only in the second half of 2019 and therefore not completed by the end of the year.

The Seed Money Facility (SMF) projects submitted in March their interim report. Few projects completed their work before the standard 12-month implementation period and majority finalised the implementation by the end of August. Their final report has been submitted in December 2019, even though due to delays from the controllers' side, majority of them missed many certificates. Financial closure of the SMF projects is expected in the first months of 2020.

The third call for proposal was launched on the 28th January 2019 and followed a two-step procedure. The deadline for submission of the EoIs was on the 8th March 2019. The DTP received overall 276 submissions with 275 EoI. The three proposals failing the eligibility check, including the five proposals which submitted duplicated EoI received the official communication from the MA/JS about the decision of the Monitoring Committee. No official complaints followed. 61 proposals were invited to submit the complete Application Form in the second step which was opened from the 3rd October until the 25th November 2019. 59 proposals were submitted and the assessment is planned to be finalised by April 2020.

The second PAC call was planned to be launched on the 24th of June 2019 with a deadline on 24th of September 2019, but due to the late receipt of the list of eligible PAC institutions from the EC/EUSDR, the call was finally officially launched on the 6th August and closed on the 8th October 2019. All 12 Priority Areas successfully submitted the proposals through the eMS system. Following the assessment, 11 proposals were approved with conditions to be fulfilled (the deadline being set to 24th of January 2020). Due to the low quality of the content, one proposal was invited to be re-submitted by February 2020.

In the second half of 2019, the MA/JS started the preparation of the second SMF call and a first concept was presented during the MC organised in Chisinau. At the beginning of 2020 the MA/JS will start the discussions with the PACs and further development of the call framework.

3. IMPLEMENTATION OF THE PRIORITY AXIS

3.1 Overview of the implementation

| ID Priority axis | | Key information on the implementation of the priority axis with reference to key developments, significant |
|------------------|--|---|
| | | problems and steps taken to address these problems |
| 1 | Innovative and socially responsible Danube region | During 2019 PA1 saw the successful closure of 17 first DTP call projects, out of which 12 were implemented under SO1.1 and 5 under SO 1.2. One important PA1 development was the emergency of a the strong, cluster type of collaboration among PA1 projects dealing with topics touching, to various degrees, the field of bio-economy (DanuBioValeNet, MadeinDanube, Moveco, EcoInnDanube, Foresda). These projects understood both the need and the opportunity of working together for delivering sturdy outcomes and they proved to be the core of the DTP Capitalization Pole 1 "Innovative Ecosystems for SMEs". In addition, these projects were able to properly embed EUSDR in their daily activities by working directly with concerned PA Coordinators and getting an active role in their WGs, especially those of PA7 and PA8. The cross-sectoral correlations of some thematic topics among projects submitted both under first and second DTP calls were encouraged. Topics tackled in this framework were massive brain drain (NewGenerationSkills, Da-Space, Innoschool), lack of appropriate entrepreneurial public policies and social services or low level of entrepreneurial skills in technological or non-technological areas (Senses, Digitrans, Women in Business). Such topics proved to be of utmost importance for the Danube Region since they were able to provide appropriate responses to some of the key challenges |
| 1 | Innovative and socially | brought about by the entrepreneurial transformations affecting the area. No MD PR has been involved in the projects emproyed under the let Call for proposals. In the second call for proposals. |
| 1- MD | responsible Danube region (ENI-MD) | No MD PP has been involved in the projects approved under the 1st Call for proposals. In the second call for proposals 7 MD PP are participating in the approved projects (Moldovan Technology Transfer Network, FACLIA - Association for Children and Youth, Organization for Small and Medium Enterprise Sector Development, Agency for Innovation and Technology Transfer, State Agency on Intellectual Property of the Republic of Moldova). |
| 1- UA | Innovative and socially responsible Danube region (ENI-UA) | No UA PP has been involved in the projects approved under the 1st Call for proposals. In the second call for proposals 3 UA PP are participating in the approved projects (European Initiatives Center, Institute of Market Problems and Economic-Ecological Researches of National Academy of Science of Ukraine, Agency of the Regional Development and Cross-Border Cooperation "Transcarpathia"). |
| 2 | Environment and culture responsible Danube region | In 2019, under PA2 there were altogether 27 projects under implementation approved in the framework of 1st and 2nd calls for proposals (6 addressing water management and flood prevention issues; 13 dealing with cultural and natural heritage valorisation; 7 focusing on restoration and management of ecological corridors and 1 tackling environmental risk management issues). 15 projects of the 1st call were finalised till the end of 2019, while the 2nd call projects reached mid-term of their implementation. Significant contributions were made to improve the status of water management and flood prevention in the Danube River Basin (DRB) by finalising the 1st call projects updating the Tisza River Basin Management Plan integrating flood management issues (JOINTISZA) and managing sediment transportation processes and sediment balance of the Danube River (DanubeSediment), while relevant steps were made within the on-going projects in developing and harmonising the sediment quality monitoring and assessment system (SIMONA); harmonising the flood and ice forecasting system (DAREFFORT) and finding effective and harmonised |

| ID | Priority axis | Key information on the implementation of the priority axis with reference to key developments, significant |
|----|------------------------------------|---|
| | | problems and steps taken to address these problems |
| | | solutions for floodplain restoration in order to reduce flood risk (Danube Floodplain) within the whole DRB. In |
| | | connection to valorisation of cultural and natural heritage of the Danube Region projects finalised their efforts in, among |
| | | others, contributing to sustainable tourism development in geo-parks (Danube GeoTour) or valorisation of ART |
| | | NOUVEAU heritage. Further more projects progressed in managing habitat and repopulation of migratory fish species |
| | | in main river corridors of DR (MEASURES). |
| 2- | Environment and culture | No MD PP has been involved in the projects approved under the 1st Call for proposals. In the second call for proposals |
| MD | responsible Danube region (ENI-MD) | 1 MD PP are participating in the approved projects (Institute of Geology and Seismology). |
| 2- | Environment and culture | No MD PP has been involved in the projects approved under the 1st Call for proposals. In the second call for proposals |
| UA | responsible Danube region (ENI-UA) | 3 UA PP are participating in the approved projects (Ukrainian Hydrometerological Center of the State Emergency Service of Ukraine, State Enterprise "Ukrainian Geological Company", City of Ivano-Frankivsk). |
| 3 | Better connected and energy | Key developments and achievements of the 1st call projects: - inland waterway transport projects contributed |
| | responsible Danube region | significantly to the further development of waterways by exchanging and transferring know-how and good practices in |
| | | the scope of waterway infrastructure, waterway maintenance and management (DANUBE STREAM), port development |
| | | (DAPhNE), improved efficiency of cross-border movements of cargo (DANTE), mitigation of negative impacts of |
| | | inland waterway transport systems on the Danube ecosystem (GREEN DANUBE) and unlocking the full potential of |
| | | the Danube – Black Sea region for maritime and waterway transport (DBS Gateway Region). The integrated traveller |
| | | information system developed within the LinkingDanube project not only assists users in making informed decisions |
| | | with regard to their journeys but it also contributes to the modal shift towards an increased use of sustainable modes of |
| | | transport, thus reducing traffic congestion and CO2 emissions. The energy-related projects brought major contributions |
| | | towards an increased use of renewable energy sources in the Danube region, either biomass (ENERGY BARGE) or |
| | | geothermal energy (DARLINGe), and developed an integrated grid-building energy management tool which was tested |
| | | in 5 different locations (3Smart). As far as the two 2nd call projects are concerned, GRENDEL progressed towards the |
| | | identification of Danube fleet investment needs and preparation of green vessel concepts while making an inventory of |
| | | existing State Aid measures meant to provide the basis for the planned Danube fleet model State Aid scheme and |
| | | RADAR progressed towards the elaboration of Danube Region Road Safety Infrastructure Improvement Strategy and Action Plans. |
| 3- | Better connected and energy | No MD PP has been involved in the projects approved under the 1st Call for proposals. In the second call for proposals |
| MD | responsible Danube region | 1 MD PP is participating one approved projects (Automobile Club of Moldova). |
| | (ENI-MD) | |
| 3- | Better connected and energy | No UA PP has been involved in the projects approved under the 1st and 2nd Calls for proposals. |
| UA | responsible Danube region | |
| | (ENI-UA) | |
| 4 | Well governed Danube region | In the field of migration and demographic change projects contributed significantly to the further understanding of the |
| | | patterns of youth migration within the Danube Region (YOUMIG) by developing institutional capacities on local level |
| | | to enhance the scarce local evidence on youth migration, contributing to improved policymaking with a focus on human |

EN 7

| ID | Priority axis | Key information on the implementation of the priority axis with reference to key developments, significant |
|------|-----------------------------|--|
| | | problems and steps taken to address these problems |
| | | capital. Statistical offices & academic organisations team up with local governments created local developmental |
| | | strategies based on improved impact indicators of youth migration. A rather targeted and pragmatic solution in the field |
| | | of economic integration of migrants was developed by the project DRIM; the information platform DANUBE |
| | | COMPASS (danubecompass.com) provides rich, harmonized and easy to understand information for new inhabitants in |
| | | eight countries of the Danube region. With regard to educational governance pioneer-work was done by the project |
| | | EduLab through promoting (new) private-public cooperation schemes for dual education at tertiary level. Under SO4.2 |
| | | twelve EUSDR PAC-support projects finalized their third and last year of implementation. With exception of PA03 |
| | | (culture) all projects moved towards consolidating their governance, especially with regard to the work of PA Steering |
| | | Groups. Moreover, the Danube Strategy Point (DSP) project went into its 2nd year of implementation, delivering |
| | | (despite larger staff fluctuation) most of the foreseen tasks. Finally, all projects of the third EUSDR support scheme – |
| | | the Seed Money Facility (SMF) – ended in 2019 and submitted their final reports. The impact of this specific scheme is |
| | | hard to estimate since it strongly depends on what will become out the "seeds" implemented. |
| 4- | Well governed Danube region | No MD PP has been involved in the projects approved under the 1st and 2nd Calls for proposals. Under the PAC call |
| MD | (ENI-MD) | MD is participating with one PP (Ministry of Health, Labour and Social Protection - EUSDR PA9). |
| 4- | Well governed Danube region | No UA PP has been involved in the projects approved under the 1st and 2nd Calls for proposals. |
| UA | (ENI-UA) | |
| 5 | Technical Assistance | In 2019 the TA beneficiaries financed under the priority 5 continued smoothly their activities related to programme |
| | | management, implementation, monitoring, control, communication and evaluation. |
| | | Main activities performed in 2019: |
| | | Call for proposals and project implementation: MC approval of 11 projects under PAC 2 call; management of the 2nd |
| | | step of the 3rd call with 61 applications, starting assessment of applications (to be finalised in 2020), preparation of new |
| | | calls (SMF2), the day-to-day management of the DTP projects contracted. |
| | | Meetings and events: 2 MC meetings, NCP meetings, 1 working group of controllers meeting, Lead Applicant seminar |
| | | for the 3rd call); co-organisers of the 8th Annual Forum of EU Strategy for the Danube Region (EUSDR), Bucharest – |
| | | Romania, 27-28/06, along with the Romanian Presidency and the European Commission. |
| | | Communication activities: RegioStars Award 2019, DTP project videos, Brochure, Project Video Competition, EWRC |
| | | Day-to-day management of the DTP website www.interreg-danube.eu |
| | | Audits: supporting performing the system audit by the AA and the audit on 61 operations by AESA. |
| | | TA beneficiaries (NCPs) submitted the yearly TA Project Progress Report to the MA/JS by the end of April 2019, in |
| | | line with the provisions laid down in the TA Agreement. |
| 5- | Technical Assistance (ENI- | TA Agreement with MD had been prepared at the beginning of 2019, including provisions on advance payment. Due to |
| MD | MD) | changes in the institution of the TA beneficiary the MD party did not sign the TA Agreement prepared and signed by the |
| IVID | [14112 <i>)</i> | MA. The procedure shall re-start in 2020. |
| | | ENI –MD expenditure was reported only for the MA/JS TA project. |
| | | 2111 1112 expenditure was reported only for the 1111/35 171 project. |
| | | |

| ID | Priority axis | Key information on the implementation of the priority axis with reference to key developments, significant |
|----------|-------------------------------|---|
| | | problems and steps taken to address these problems |
| 5- UA | Technical Assistance (ENI-UA) | The TA Agreement with UA was under checking by the UA national authority in 2019, signature of the TA Agreement is expected also in 2020. |
| | | ENI –UA expenditure was reported only for the MA/JS TA project. |

3.2 Common and programme specific indicators (Article 50(2) of Regulation (EU) No 1303/2013)

Priority axes other than technical assistance

(1) ID Indicator

| Priority axis | 1 - Innovative and socially responsible Danube region |
|---------------|--|
| Investment | 1b - Promoting business investment in R&I, developing links and synergies between enterprises, research and development centres and the higher education sector, in |
| priority | particular promoting investment in product and service development, technology transfer, social innovation, eco-innovation, public service applications, demand stimulation, |
| | networking, clusters and open innovation through smart specialisation, and supporting technological and applied research, pilot lines, early product validation actions, |
| | advanced manufacturing capabilities and first production, in particular in key enabling technologies and diffusion of general purpose technologies, as well as fostering |
| | investment necessary for strengthening the crisis response capacities in health services |

Observations

Table 2: Common and programme specific output indicators - 1.1b

Measurement Target

| (1) | 110 | Indicator | unit | value | 2017 | Obstructus |
|-----|------|--|-------------|----------|--------|--|
| F | CO04 | Productive investment: Number of enterprises receiving non-financial support | Enterprises | 1,070.00 | 928.00 | Crowdstream project, output Trained for start-ups and social enterprises , containing 18 trainings with a target value of 180, in the form of training's for business support organizations to develop innovative services to support small and medium enterprises for attracting financial support via crowdfunding methods. |
| | | Productive investment: Number of enterprises receiving non-financial support | Enterprises | 1,070.00 | | In the first two calls for proposals, the Monitoring Committee approved five projects aiming at reaching 1,065 enterprises that will receive non-financial support (e.g. DanubeBioValNet project offers support for SMEs in understanding the bio-based industry, future trends and challenges; FORESDA project offers support to SMEs in innovation management aiming at developing a joint innovation roadmap with the potential for the emergence of new products/services/business models). In the second call for proposals additional 11 projects were approved which plan to support 200 additional enterprises by providing non financial support. |
| F | CO26 | Research, Innovation: Number of enterprises cooperating with research institutions | Enterprises | 530.00 | | Made In Danube, output 'Supporting the companies cooperating with RTO', with a target value of 40 was one of the most important outputs of the project as it is directly related to the main objective of the project. The Output was aimed at provision of support for 40 companies in establishing the cooperating with RTOs through application of several tools & actions designed and performed in the frame of MiD Project (e.g. direct interviews with companies, conduction of TO/TR/IAs, Brokerage events,) and specifically to respond to the needs of the 3 existing regional initiatives. As a result, 40 companies signed Innovation Partnership Agreement (IPA) or Cooperation Agreement (CA) with RTOs or with other SMEs, active in the Bio-economy sector. |
| S | CO26 | Research, Innovation: Number of enterprises cooperating with research institutions | Enterprises | 530.00 | 527.00 | In the first two calls for proposals, the Monitoring Committee approved seven projects that are aiming foster the cooperation with research institutions of 526 enterprises (e.g. MOVECO project support SMEs in engaging in new green partnerships ith public or private research and innovation partners, contributing to making their business activity more resource-efficient; Made in Danube project will support companies in cooperating with support organisations by developing specific tools and actions; Once project from SO 2.2, DANUrB, brings its cross-cutting contribution to CO26 by enhancing cooperation among 46 enterprises/research institutions). |
| F | P01 | Number of strategies for improving the institutional and infrastructural framework conditions for research and innovation developed and/or implemented | Number | 17.00 | | By the end of 2019, 41 strategies have been developed by the projects. Accelerator developed the Joint Strategy on the Promotion of Acceleration Programmes – is intended to embed entrepreneurial acceleration programmes and schemes into relevant policies (e.g. financial instruments) across Danube Region. This output was uptaken by relevant for equity financing organisations from countries participating in the project and used in their effort to better meet the needs of promising DR start-ups. More information available on the following link: http://www.interreg-danube.eu/approved-projects/accelerator. |
| | P01 | Number of strategies for improving the institutional and infrastructural framework conditions for research and innovation developed and/or implemented | | 17.00 | | Out of the 14 projects approved under SO 1.1, 13 projects are developing strategies aiming at improving the framework conditions for innovation in different sectors (e.g. Ecoinn Danube project is developing a strategy aiming at common strategy for Danube region aiming at renewable energy usage and energy saving; D-STIR project is developing a transnational strategy for applying Responsible Research Innovation in the Danube region; DanuBioValNet is developing a joint bio-based industry cluster policy strategy). |
| | P02 | Number of tools for improving the institutional and infrastructural framework conditions for research and innovation developed and/or implemented | | 34.00 | 84.00 | DanuBioValNet developed Value Chains and Road Maps for Phytopharma, Eco-construction and Bio- based packaging. These value chain describe the full range of activities that firms and workers do to bring a product from its conception to its end use and beyond. SmartFactoryHub: Tool - Smart Factory Cooperation Platform (SFCP), presented by the Pomurje Technology Park, is intended to support SMEs by providing a geographic overview and give some information about actors, good practices, projects and facilitators and, thus, foster the match between the demand (production/manufacturing organizations) and supply (solution providers) needs: The platform is available on the following link: http://www.p-tech.si/sfh-mapping/. |
| S | P02 | Number of tools for improving the institutional and infrastructural framework conditions for research and innovation developed and/or implemented | | 34.00 | 113.00 | Out of the 14 projects approved under SO 1.1, 13 projects are developing tools aiming at improving the framework conditions for innovation in different sectors (e.g. MOVECO project is developing circular economy tools aiming at improving the capacities of R&D, Business Support Organisations, public bodies to kick-start the implementation of Circular Economy in the Danube region; ACCELERATOR project is developing a joint guide on how to develop and test acceleration programmes). |
| F | P03 | Number of pilot actions for improving the institutional and infrastructural framework conditions for research and innovation developed and/or implemented | Number | 17.00 | 40.00 | In the first two calls for proposals, the Monitoring Committee approved 14 projects addressing Specific Objective 1.1. InnoHPC: Pilots for electronic and automotive industries. Within these two pilots InnoHPC project targeted SMEs and clusters, providing them with opportunities to increase their efficiency of innovations and join transnational value-chains in the Danube region. Higher education and research institutions with High Performance Computers got access to exciting real-life cases and opportunities and were provided with the chance of exploiting their entrepreneurial potential. Policy-makers and business support organizations received a valuable institutional support for their policies and initiatives. More information can be found on the following link: http://www.interreg-danube.eu/approved-projects/innohpc. |
| S | P03 | Number of pilot actions for improving the institutional and infrastructural framework conditions for research and innovation developed and/or implemented | | 17.00 | 123.00 | All projects selected under SO 1.1 are implementing pilot actions aiming at testing different concepts, services, guidelines developed by the partnership (e.g. ResInfra@DR projects is implementing peer reviews and ex-ante assessment in establishing new research infrastructures; CrowdStream project is implementing pilot actions on campaigning models for crowd funding). |
| F | P04 | Number of strategies for increasing competences of employees in the business sector and strengthening entrepreneurial spirit developed and or/implemented. | | 15.00 | 1.00 | Excellence in RESTI developed a strategy and roadmap defined the current challenges to the management of science, technology and innovation projects within the Danube macro-region, and suggested steps for policy action with the intention to provide strategic direction for the improvement of the institutional framework conditions for research and innovation. This strategy and roadmap document is based on the premise that the lack of adequate project management capacities, as well as the existing disparities among the countries within the Danube macro-region, particularly with regard to science, technology and innovation projects, can be successfully tackled by national and regional stakeholders. The document concludes by providing A Vision for Change as a reflection on the expected potential impacts, resulting from the implementation of the proposed measures. |
| S | P04 | Number of strategies for increasing competences of employees in the business sector and strengthening entrepreneurial spirit developed and or/implemented. | | 15.00 | 34.00 | Out of the 11 projects approved under SO 1.2, 8 projects are developing strategies aiming at increasing the competences of employees in the business sector and strengthening the entrepreneurial spirit (e.g. SENSES project is developing a Social Enterprise Strategy for the Danube Region focusing on policy niches as social impact markets, financial instruments addressed to social enterprises, social enterprise acceleration techniques, public procurement favoring social enterprises etc.; DA-SPACE project is developing a strategy to boost innovation and entrepreneurship). |
| F | P05 | Number of tools for increasing competences of employees in the business sector and strengthening entrepreneurial spirit developed and or/implemented | Number | 30.00 | 31.00 | Digitrans developed Regional Hubs: Incubators' main advantages lie in possibility of fostering collaboration of heterogeneous groups from various sectors with different levels of expertise and experience — all working towards achieving certain goals. They are meant to help SMEs gain a better understanding of how to transform into the digital age and offer an open environment available to anyone looking for a better comprehension of digital transformation as a whole or the use of innovation methods. The incubators are also ideal for anyone looking for a place to collaborate with others following trial and error approaches without the fear of failure. The list of Digitrans Incubators can be found here: http://www.interreg-danube.eu/approved-projects/digitrans/section/regional-incubators. |

| | | entrepreneurial spirit developed and or/implemented | | | | a mentoring scheme which will contribute in increasing the competences of employees from the dustness sectors). |
|---|-----|--|--------|-------|--------|---|
| F | P06 | Number of pilot actions for increasing competences of employees in the business sector and strengthening entrepreneurial spirit developed and or/implemented | | 15.00 | | NewGenerationSkills Pilot implementation of the Innovation Labs. Through the piloting of the Innovation Labs (ILs), partners validated their locally created structures and services designed to support the local youth in their innovative ventures. The complex support services and processes offered by the ILs acted as a magnet for the local youth and contributed to the advancement of the local innovation ecosystem. Innovation Labs are conceived as a physical and/or virtual environment for generating, developing and commercializing innovative youth' ideas through relevant trainings, mentoring and technology put at their disposal, following the entrepreneurial pathway. More information on the format, role and the location of Innovation Labs can be found on the following link: http://www.interreg-danube.eu/approved-projects/newgenerationskills/outputs. |
| S | P06 | Number of pilot actions for increasing competences of employees in the business sector and strengthening entrepreneurial spirit developed and or/implemented | | 15.00 | | Out of the 11 projects approved under SO 1.2, 8 projects are developing pilot actions aiming at increasing the competences of employees in the business sector and strengthening the entrepreneurial spirit (e.g. project SENSES is developing social enterprise capitalization pilot which aims to establish new quality of intensified cooperation between social enterprises and their ecosystems across the Danube region; project DA-SPACE is developing an entrepreneurship training piloting an open innovation lab in which SMEs, PA and the civil society, can create fundaments for innovation together with young talents). |
| F | P07 | No. of documented learning interactions in finalised operations | Number | 96.00 | 262.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 17 projects approved are developing outputs that are contributing to this output indicator. DA-SPACE, Entrepreneurship Training – this output was implemented with the scope of promoting entrepreneurial culture among young students in order to provide them with the right knowledge and tools for starting their own business. ResInfra@DR: Stakeholder dialogue workshops. The five meetings were organised to provide fora for learning interactions whilst the four dialogue workshops contributed to generating knowledge and strategic intelligence and resulted in the preparation of 3 thematic guidelines and 1 document setting up the strategic direction for pilots. |
| S | P07 | No. of documented learning interactions in finalised operations | Number | 96.00 | 495.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 17 projects approved are developing outputs that are contributing to this output indicator (e.g. INNO HPC project is implementing a training for HPC providers and competence centres in the form of winter schools as well as workshops for SMEs from electronic and automotive industry). |

| | | Total | Qualitative | Total | Qualitative | Total | Qualitative | Total | Qualitative |
| 1.2 | Intensity of cooperation of key actors in the programme area in order to increase competences for business and | | 4.97 | | | | | | |
| | social innovation (survey based composite indicator) | | | | | | | | |

| ID | Indicator | 2014 Total | 2014 Qualitative |
|-----|---|------------|------------------|
| 1.2 | Intensity of cooperation of key actors in the programme area in order to increase competences for business and social innovation (survey based composite indicator) | | 3.22 |

| Priority axis | 2 - Environment and culture responsible Danube region |
|---------------|--|
| Investment | 6b - Investing in the water sector to meet the requirements of the Union's environmental acquis and to address needs, identified by the Member States, for investment that |
| priority | goes beyond those requirements |

Table 2: Common and programme specific output indicators - 2.6b

| (1) | ID | Indicator | Measurement | Target | 2019 | Observations |
|-----|-----|---|-------------|--------|-------|--|
| | | | unit | value | | |
| F | P07 | No. of documented learning interactions in finalised operations | Number | 22.00 | 9.00 | Experts trained at Sediment Management Workshop - The scope of the international workshop was to train and inform the participating 53 national experts, coming from different DR countries, on using good practices of sediment management and the catalogue of measures developed by the DanubeSediment project. The training workshop offered also good opportunity for transnational discussion and exchange of knowledge towards future strategic issues of sediment management within the Danube River Basin. |
| S | P07 | No. of documented learning interactions in finalised operations | Number | 22.00 | 27.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 6 projects approved are implementing learning interactions contributing to the output indicator (e.g. JOINTISZA project is implementing a Training of best management on urban hydrology). |
| F | P08 | Number of strategies for improving transnational water management and flood risk prevention developed and/or implemented | Number | 7.00 | 0.00 | In the first two calls for proposals, the Monitoring Committee approved 6 projects addressing Specific Objective 2.1 which are under implementation and the outputs will be delivered towards the end of the projects. |
| S | P08 | Number of strategies for improving transnational water management and flood risk prevention developed and/or implemented | Number | 7.00 | 3.00 | Out of the 6 approved projects, 3 are developing strategies for improving transnational water management and flood risk prevention (e.g. e.g JOINTISZA project is developing a Public Involvement and Participation Strategy aimed at strengthening approaches and cooperation among the relevant actors of the river basin management planning process; Danube Floodplain project is developing Floodplain restoration/preservation action plan). |
| F | P09 | Number of tools for improving transnational water management and flood risk prevention developed and/or implemented | Number | 15.00 | 6.00 | Final Draft of the update of the Integrated TRBMP – In cooperation of relevant actors and stakeholders of the five Tisa River Basin (TRB) countries, in the framework of JOINTISZA project, the draft ITRBMP was developed, characterising the basin's main challenges, identifying pressures and assess status of waterbodies of the TRB, assessing also flood related risks and outlining the integrated joint programme of measures to reach good status of the waters. Danube Sediment Management Guidance contains recommendations for reducing the impact of a disturbed sediment balance, e. g. on the ecological status and on flood risk along the Danube River. Sediment quality sampling and laboratory protocols for Hazardous Substances –The two outputs of SIMONA project are comprehensive, standardized and harmonized protocols of sediment sampling and analytical methods. |
| S | P09 | Number of tools for improving transnational water management and flood risk prevention developed and/or implemented | Number | 15.00 | 42.00 | All 6 approved projects are developing tools for improving transnational water management and flood risk prevention (e.g. JOINTISZA project is developing an integrated Tisza river management plan and is improving the GIS database; CAMARO-D project is developing Land Use management Plan aimed at steering land use to safeguard water resources and reduce flood risk; Danube Floodplain project is developing DRB Strategic Guidance for floodplain restoration and preservation aiming to reduce floods risk and reaching environmental and conservation objectives). |
| F | P10 | Number of pilot actions for improving transnational water management and flood risk prevention developed and/or implemented | Number | 7.00 | 0.00 | In the first two calls for proposals, the Monitoring Committee approved 6 projects addressing Specific Objective 2.1 which are under implementation and the outputs will be delivered towards the end of the projects. |
| S | P10 | Number of pilot actions for improving transnational water management and flood risk prevention developed and/or implemented | Number | 7.00 | 12.00 | Out of the 3 approved projects, 5 are implementing pilots aiming at improving transnational water management and flood risk prevention (e.g. JOINTISZA project will develop and test in two pilot areas a process oriented spatial decision support tool for urban water management together with a training on managing urban hydrology; Danube Floodplain is testing flood prevention measures). |

| (1) | ID | Indicator | 2018 | 2017 | 2016 | 2015 | 2014 |
|-----|-----|---|-------|-------|------|------|------|

| Priority axis | 2 - Environment and culture responsible Danube region |
|---------------------|---|
| Investment priority | 6c - Conserving, protecting, promoting and developing natural and cultural heritage |

Table 2: Common and programme specific output indicators - 2.6c

| [[1 |) ID | Indicator | Measurement | Target | 2019 | Observations |
|------|--------|---|-------------|--------|--------|--|
| | | | unit | value | | |
| F | P07 | No. of documented learning interactions in finalised operations | Number | 43.00 | 86.00 | Iron Age Danube organised the Archaeological Camp Hungary 2018 which was instrumental for exchange of know-how and technologies and supported the development and testing of joint methodologies and strategies in concrete circumstances (through complex field research and excavation on the Süttő archaeological site), enhance the academic network, for working on the presentation agendas for prehistoric landscapes and for raising public interest in the archaeology of the Iron Age (public event, school and family programmes and museum education programmes). URBforDAN developed and delivered the training on participatory approach towards improved governance and management of urban and peri-urban forests (UPF) based on which the employees of all 7 PP city administrations successfully implemented a series of workshops with key stakeholders. |
| S | P07 | No. of documented learning interactions in finalised operations | Number | 43.00 | 142.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all thirteen projects approved are developing outputs that are contributing to this output indicator (e.g. CultPlatForm_21 project is exchanging experience and lessons learnt within the WG Culture dealing with thematic issues concerning existing and potential cultural routes, enlargement strategy and coordination of the mapping process (the Danube cultural routes hot spots and their tourism potential); Iron-Age-Danube project is organising International camps on Iron Age landscapes aiming at strengthening the international network, bringing monumentalized landscapes into public focus and act as a learning interaction for general public). |
| F | P11 | management of natural and cultural heritage and resources developed and/or implemented | Number | 14.00 | 8.00 | Common strategy for protection and sustainable use of Ecosystem Services (ES) in Karst ecological regions is elaborated by the ECO KARST project, generating strategic guidance for upgrading ES inside and outside protected areas and for starting new local Pro-Biodiversity Business models and networking. The strategy includes a checklist of principles to find a balance between conservation, protection and economic development of karst regions based on cross-sectoral evaluation and collaboration. Strategies for management of natural resources - a set of strategic actions recommendations, elaborated by the LENA project, towards a better integrated approach to management of natural protected areas, agriculture, fisheries and aquaculture, non-timber forest products harvesting, ecotourism and e-mobility, at national, regional and EU level. |
| S | P11 | Number of strategies for preserving and management of natural and cultural heritage and resources developed and/or implemented | Number | 14.00 | 42.00 | Out of the 13 approved projects, 9 are developing strategies aiming at preserving and management of natural and cultural heritage and resources (e.g. ART NOUVEAU project is developing a joint strategy for the preservation of art nouveau cultural heritage; CultPlatForm_21 project is developing 5 action plans for innovative Danube cultural routes in the direction of support the creating of new / amending existing cultural routes, also showing synergies with existing programmes such as the cultural routes programme of the Council of Europe; REDISCOVER is developing a Joint Visibility Strategy, tailoring locally and jointly applicable visibility methods and surfaces for potential locallyoint Jewish Cultural Heritage tourism products and thematic routes). |
| F | P12 | Number of tools for preserving and management of natural and cultural heritage and resources developed and/or implemented | Number | 29.00 | 35.00 | The guidance document elaborated by the ECO KARST project describes the chain of methodology that can be used in participatory Mapping and Assessment of Ecological Services (MAES) processes resulting new interpretation of landscapes, stronger network of local stakeholders and overview of ecosystem contributions for economy. DANUrB developed thematic tours covering settlements along the Danube in the seven participating countries. The mapping of cultural heritage focused primarily on small and midsized towns, but in certain cases, such as in the areas around Ráckeve in Hungary (so called Szigetzug microregion) and Krems in Austria (Wachau region), it included also villages. In several cases (Bačka Palanka – Ilok, Esztergom – Štúrovo etc.), the tours cross national borders and connect heritage of towns located in different countries. |
| S | P12 | Number of tools for preserving and management of natural and cultural heritage and resources developed and/or implemented | Number | 29.00 | 148.00 | All 13 projects approved are developing tools aiming at preserving and management of natural and cultural heritage and resources (e.g. DANUrB project is developing DANUrB tours accessible in PocketGuide App and branding of the Danube Cultural Promenade; LENA project is developing certification and/or labelling procedures fitted to the protected areas). |
| F | P13 | Number of pilot actions for preserving and management of natural and cultural heritage and resources developed and/or implemented | Number | 14.00 | 12.00 | Pilot innovative geo-interpretation methods tested - 8 pilot actions were implemented by 8 partner geoparks, testing different geo-interpretation methods in the form of interpretation points, centres, trails, innovative exhibitions, geo-challenges, as part of the Danube GeoTour visitor infrastructure network for 8 most common geological phenomena and processes in the Danube geological area (tectonics, metamorphic processes and rocks, geology over time, water in time, geomorphology, volcanology, dialogue between earth & humans, geological hazards). This ensures transnational learning and transfer of practices from participating to other geoparks and organisations dealing with the heritage interpretation besides smarter presentation and preservation of geo-heritage of DR. |
| S | P13 | Number of pilot actions for preserving and management of natural and cultural heritage and resources developed and/or implemented | Number | 14.00 | 41.00 | Out of the 13 approved projects, 10 are implementing pilots aiming at preserving and management of natural and cultural heritage and resources (e.g. LENA project is implementing a pilot on sustainable agriculture in 4 protected areas; DanubeGeoTour project is implementing innovative geoInterpretation methods in the form of interpretation points or centres in participating Geoparks). |

Table 2: Common and programme specific output indicators - 2.6d

| (1) | ID | Indicator | Measurement unit | Target value | 2019 | Observations |
|-----|-----|--|---------------------|-----------------|-------|--|
| | P07 | No. of documented learning interactions in finalised operations | | 37.00 | | DriDanube - Training of trainers for Drought User Service - held on 5 October 2017 in Brno, Czech Republic, dedicated to experts in drought monitoring represented by the project consortium. In the course of the training, the experts were presented the prototype of Drought User Service (DUS) tool developed by the project for drought monitoring and early warning along with detailed presentation of all its functionalities and how to use them. During the course participants were able to practice its usage as well. The training helped project partners (training participants) as future trainers of their respective national community, to obtain the capacities for organisation of national training on DUS where targeted end-users such as national authorities and stakeholders will be trained on how to use DUS for improved preparedness to drought. |
| S | P07 | No. of documented learning interactions in finalised operations | Number | 37.00 | 39.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 8 projects approved are developing outputs that are contributing to this output indicator (e.g. ConnectGREEN project is implementing Multi-sectoral meetings and/ or fora o (1) discuss preliminary finding relevant for the Strategy and (2) final outputs/results with members of relevant CC Working Groups including WGs on Biodiversity, Spatial Planning and Transport; Sava TIES is implementing SavaParks Network Capacity Building Programme aiming at knowledge transfer in connection to good practices in habitat management that prevents plant invasions and helps contain good status of biodiversity). |
| F | P14 | Number of strategies for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands developed and/or implemented | Number | | | Transboundary Mura-Drava-Danube (MDD) Action Plan - The action plan developed by the coop MDD project aims to summarise those activities that are needed for restoring and preserving a dynamic river corridor, which should be implemented in a harmonized way on a transboundary level for a stronger impact and higher efficiency and synergies. It thus constitutes the key operational framework for implementing concrete solutions to preserve and restore the MDD ecological corridor. |
| S | P14 | Number of strategies for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands developed and/or implemented | Number | 8.00 | 12.00 | Out of the seven approved projects under SO 2.3 six are developing strategies for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands (e.g. coop MDD project will develop transboundary Mura-Drava-Danube Action Plan (TMDD Action Plan) which will be the key operational framework for carrying out concrete solutions in the planned TBR MDD that will restore, conserve and improve the MDD ecological corridor). |
| F | P15 | Number of tools for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands developed and/or implemented | Number | 16.00 | 1.00 | Transboundary Management Plan – The TMP is the main tool for future coordinated management of the 5-country and 3-river ecological corridor Transboundary Biosphere Reserve Mura-Drava-Danube, which will soon be protected as the world's first 5-country Biosphere Reserve. The TMP consists of the Guidelines for a dynamic river corridor describing the joint management objectives to be reached and the Transnational Learning Network Concept describing the transboundary concept for the RIVER'SCOOLs network. It provides for the first time a harmonised approach to management of the river corridor that is agreed on transboundary level. The 5-country Coordination Board (including ministry, Protected Area, municipality, NGO representatives) use the TMP as a basis for formulating the work plan in the 5-country TBR MDD nomination form to UNESCO. |
| | | Number of tools for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands developed and/or implemented | | | 58.00 | Capacity Building Seminars – One-one Capacity Building Seminar was organised in each five countries of Transboundary Biosphere Reserve Mura-Drava-Danube, altogether with more than 200 participants to transfer the results developed within the coop MDD project and to increase the capacity of stakeholders of the region as well as Protected Areas outside the region in the management of transboundary ecological corridors and to promote the river corridor MDD and the management solutions developed within coop MDD. |
| F | P16 | Number of pilot actions for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands developed and/or implemented | Number | 8.00 | 16.00 | Pilot Implementation of TMP - RIVER'SCOOLs - The pilot implementation of the jointly developed Transboundary Learning Network Concept (TLN Concept) consists of eight RIVER'SCOOLs (RS), developed by the eight participating Protected Areas within the planned Transboundary Biosphere Reserve Mura-Drava-Danube (TBR MDD). RIVER'SCOOLs are outdoor learning areas, mostly at the river or in the floodplain, that allow experience-oriented learning about the TBR MDD and river ecosystems. Each RS focuses on different topics of dynamic river corridor, values of intact ecosystems for people, and integrated Biosphere Reserve management, raising awareness among local population, students and visitors in general on the TBR MDD, the natural values and ecosystem services connected to it, as well as the ecological corridor that it represents. |
| S | P16 | Number of pilot actions for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands developed and/or implemented | Number | 8.00 | 58.00 | Five projects approved under SO 2.3 are implementing pilot actions for strengthening approaches to preservation, restoring and management of bio-corridors and wetlands (e.g. DANUBEparksCONNECTED project is will implement pilot actions to improve habitat quality of WILDislands; to test and demonstrate best practice management, of valuable dry habitat sites; as well as testing different approaches to managing riparian forests to ensure connectivity of habitats along the Danube river; D2C project is implementing pilot actions aiming at contributing to the transnational strategic vision in Green Belt in the Danube Region 2030 by testing the potential implementation of transnational identified ecological corridors including identified Ecosystem Services (ESS) at the local/regional level). |
| F | P17 | Number of strategies for improved cooperation and interoperability among the emergency response authorities and stakeholders developed and/or implemented | Number | 4.00 | 0.00 | In the first call for proposals, the Monitoring Committee approved one project addressing SO 2.4 which are under implementation. |
| S | P17 | Number of strategies for improved cooperation and interoperability among the emergency response authorities and stakeholders developed and/or implemented | Number | | | DRiDanube project is developing a strategy to improve drought emergency response which will address basic weaknesses of the drought management process, identified by the review of existing status. |
| F | P18 | Number of tools for improved cooperation and interoperability among the emergency response authorities and stakeholders developed and/or implemented | Number | 8.00 | 3.00 | Drought User Service with manual – The Drought User Service (DUS), or Drought Watch monitoring tool, developed by DriDanube project, is an open-source web application with GIS functionality that provides spatial and temporal view of drought-related datasets over the Danube Region, improving the national capacities to monitor, forecast, evaluate and respond during drought development, as well as enables monitoring of drought conditions through the same set of indices across all intersecting countries, allowing harmonised monitoring and comparable view on drought conditions. |
| S | P18 | Number of tools for improved cooperation and interoperability among the emergency response authorities and stakeholders developed and/or implemented | Number | 8.00 | 3.00 | DRiDanube project is developing/ implementing several tools for improving cooperation and interoperability among the emergency response authorities and stakeholders (e.g. Drought User Service with manual, a methodology for drought impact assessment, methodology for drought risk assessment). |
| F | P19 | Number of pilot actions for improved cooperation and interoperability among the emergency response authorities and stakeholders developed and/or implemented | Number | 4.00 | 0.00 | In the first call for proposals, the Monitoring Committee approved one project addressing SO 2.4 which are under implementation. |
| S | P19 | Number of pilot actions for improved cooperation and interoperability among the emergency response authorities and stakeholders developed and/or implemented | Number | 4.00 | 2.00 | DRiDanube project is implementing a pilot action testing the Drought User Service in 4 countries participating in the project. |

|---------------|--|
| Investment | 7c - Developing and improving environmentally-friendly (including low noise) and low-carbon transport systems, including inland waterways and maritime transport, ports, |
| priority | multimodal links and airport infrastructure, in order to promote sustainable regional and local mobility |

Table 2: Common and programme specific output indicators - 3.7c

| - [(| l) ID | Indicator | Measurement | Target | 2019 | Observations |
|------|----------------|---|-------------|--------|--------|--|
| | | | unit | value | | |
| I | P07 | No. of documented learning interactions in finalised operations | Number | 48.00 | 32.00 | DAPhNE documented learning interaction – Port administration processes and port management model workshops were aimed at the improvement and harmonisation of administrative processes across ports and the improvement of port business strategies with the support of management models. During the workshop on port management models several best practices were presented in connection to smart ports, port management studies, |
| | | | | | | small private-owned ports, port concessions. The workshops fell within the scope of the harmonized approach initiative Same river, same rules focusing on administrative processes. |
| 5 | P07 | No. of documented learning interactions in finalised operations | Number | 48.00 | 66.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 13 projects approved are developing outputs that are contributing to this output indicator. |
| I | P20 | No of strategies for the improvement of transport and transport systems developed and/or implemented | Number | 16.00 | 30.00 | GREEN DANUBE strategy – Strategy for greening the Danube inland waterway transport offers recommendations for suitable greening measures addressing infrastructure, ship-related technical measures, ship operational measures, education and qualification and logistics concepts. The document includes a roadmap for greening the Danube IWT and a list of possible actions. |
| 5 | P20 | No of strategies for the improvement of transport and transport systems developed and/or implemented | Number | 16.00 | 56.00 | All 13 projects approved are developing strategies for the improvement of transport and transport systems (e.g. DANTE project develops a Danube IWT Administration Strategy accompanied by an Action Plan to help relevant authorities and organisations in harmonising the regulations and administrative requirements towards IWT in order to simplify existing procedures and render them more efficient). |
| I | P21 | No of tools for the improvement of transport and transport systems developed and/or implemented | Number | 32.00 | 68.00 | DANTE – tool - Barrier reporting tool facilitates the collection of inputs from the inland waterway transport stakeholders with regard to problems encountered while navigating the Danube. During the project implementation, the inputs were collected in a database that provided the basis for the elaboration of recommendations towards the removal of barriers so as smooth and predictable processes are ensured along the Danube. Upon project closure, the barrier reporting tool remained operational at https://www.prodanube.eu/administrativebarriers/ with a view to further improvements. |
| S | P21 | No of tools for the improvement of transport and transport systems developed and/or implemented | | 32.00 | 109.00 | All 13 projects approved are developing tools for the improvement of transport and transport systems (e.g. DANTE project develops a transnational online IWT barrier reporting tool generating an overview of every-day administrative barriers encountered by the shippers in order to develop solutions to overcome them; CityWalk developes a Guidebook for designing Walkability Plans aimed at providing support to the partner cities in the preparation of the Walkability Plans. |
| I | P22 | No of pilot actions for the improvement of transport and transport systems developed and/or implemented | | 16.00 | 19.00 | LinkingDanube: pilot action testing the Danube Region Journey Planner concept and tool. The Journey Planner employs the linking services approach set out by the European Commission in its Delegated Regulation 2017/1926 on the provision of EU-wide multimodal travel information services. It is a decentralised technical tool providing transnational traveller information services across operators and borders through a novel harmonised interface. The added value and the innovative aspect of the tool is that travellers can plan a complete transnational multimodal journey using one single service which is updated in real time (unlike Google Maps for instance) given the linking of different national services. |
| 8 | P22 | No of pilot actions for the improvement of transport and transport systems | | 16.00 | 73.00 | Out of the 13 approved projects, 12 are implementing pilot actions for the improvement of transport and transport systems (e.g. Transdanube.Pearls implements 9 pilot actions to test three types of new/ improved mobility services (e.g. bike rental services, bike carriage facilities, flexible public transport services) in the Danube region). |

Table 2: Common and programme specific output indicators - 3.7e

| (1) | ID | Indicator | Measurement | Target | 2019 | Observations |
|-----|-----|---|-------------|--------|-------|---|
| F | P07 | No. of documented learning interactions in finalised operations | Number | 16.00 | 8.00 | ENERGY BARGE documented learning interaction –a workshop on logistic requirements was organised with the ports of Aschaffenburg and Bamberg in the context of the project to facilitate the know-how exchange and cross-fertilisation regarding logistic requirements of the bioenergy industry and define benchmarks and success factors for the handling and storage of biomass. During the workshop, the shortcomings and barriers regarding investments, services and information needs of potential customers were addressed as well as aspects related to the navigability of the Danube, the vessel types operating in the Danube region and the transport of biomass. |
| S | P07 | No. of documented learning interactions in finalised operations | Number | 16.00 | 14.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 3 projects approved are developing outputs that are contributing to this output indicator (e.g. 3Smart project is implementing transnational training activities aimed at capacity building, exchange of experience and harmonising knowledge on energy management system setting up and operation; ENERGY BARGE project is implementing regional B2B meetings on green bioenergy logistics). |
| F | P23 | No of strategies to improve energy security and energy efficiency developed and/or implemented | Number | 5.00 | 4.00 | DARLINGe strategy - Transnational Danube Region Geothermal Strategy is aimed at increasing the sustainable use of geothermal energy in the region. It includes an analysis of the geothermal energy framework as well as the policy context and it presents the geothermal resources and their utilisation, the operational and technological issues of geothermal heating systems, the heat market aspects and economics of geothermal heating and makes recommendations as to how to build on the current strengths and opportunities and how to overcome the barriers. |
| S | | No of strategies to improve energy security and energy efficiency developed and/or implemented | Number | 5.00 | 7.00 | All 3 projects approved are developing strategies aimed at improving energy security and energy efficiency (e.g. DARLINGe project develops a Transnational Danube Region Geothermal Strategy aimed at enhancing the use of still untapped geothermal energy resources in the region). |
| F | P24 | No of tools to improve energy security and energy efficiency developed and/or implemented | Number | 11.00 | 5.00 | ENERGY BARGE: Modal shift platform for green bioenergy logistics (www.energy-barge.eu), facilitates the cooperation between market actors along the biomass and bioenergy value chains. Thus, forwarding companies from the biomass and bioenergy sectors can use the platform to inform themselves about ports, logistics service providers and the conditions of transporting biomass products on the Danube. The tool also supports the modal shift towards the waterway transport as well as the increase of cargo transport on the Danube river. The extension of the tool's functionalities is foreseen in the 3rd call proposal DanuP-2-Gas which received a high score. The extension consists of further information with regard to energy infrastructure, electricity and gas grid, further data on fermentable biogenic residue that can be used for energy storage. |
| S | | No of tools to improve energy security and energy efficiency developed and/or implemented | Number | 11.00 | 7.00 | All 3 projects approved are developing tools aimed at improving energy security and energy efficiency (e.g. 3Smart project develops a modular cross-spanning energy management tool to enable energy management within and between buildings and electricity distribution grids for the Danube region) |
| F | P25 | Number of pilot actions to improve energy security and energy efficiency developed and/or implemented | Number | 5.00 | 6.00 | 3Smart: pilot action testing the developed Integrated grid-building energy management tool. Operational logs were kept so as to assess the benefits achievable with 3Smart energy management as compared to conventional operations in buildings and grids but also to extract reliable data for the elaboration of the cost-benefit analysis. The CBA can be used by energy regulators responsible for the development of measures to support demand response abilities within the energy networks or by local public authorities in deciding and planning the return on such investments. The versatile character of the developed tool allows its uptake in other domains, e.g. energy management in historical urban sites (Store4HUC proposal in Interreg Central Europe Programme) and water distribution system or water treatment plant (REWAISE project in H2020). |
| S | P25 | Number of pilot actions to improve energy security and energy efficiency developed and/or implemented | Number | 5.00 | 9.00 | All 3 projects approved are implementing pilot actions aimed at improving energy security and energy efficiency (e.g. ENERGY BARGE project implements 2 pilot actions in 2 Danube ports to test the processing, handling and storage of biomass for energy production in the region). |

| (1) | ID | Indicator | 2018 | 2017 | 2016 | 2015 | 2014 |
|-----|---|---|------|------|------|------|------|
| F | P07 | No. of documented learning interactions in finalised operations | 1.00 | 1.00 | 0.00 | 0.00 | 0.00 |
| S | P07 No. of documented learning interactions in finalised operations 14.00 | | | | | | 0.00 |
| F | P23 | No of strategies to improve energy security and energy efficiency developed and/or implemented | 0.00 | 0.00 | 0.00 | 0.00 | 0.00 |
| S | P23 | No of strategies to improve energy security and energy efficiency developed and/or implemented | 7.00 | 7.00 | 0.00 | 0.00 | 0.00 |
| F | P24 | No of tools to improve energy security and energy efficiency developed and/or implemented | 1.00 | 0.00 | 0.00 | 0.00 | 0.00 |

|-----|---|------------|------------------|
| 3.2 | Intensity of cooperation of key actors in the programme area in order to contribute to energy security and energy efficiency (survey based composite indicator) | | 3.90 |

| Priority axis | 4 - Well governed Danube region |
|---------------|--|
| Investment | 11a - Enhancing institutional capacity of public authorities and stakeholders and efficient public administration through actions to strengthen the institutional capacity and the |
| priority | efficiency of public administrations and public services related to the implementation of the ERDF, and in support of actions under the ESF to strengthen the institutional |
| | capacity and the efficiency of public administration |

Table 2: Common and programme specific output indicators - 4.11a

| [[1 |) ID | Indicator | Measurement | Target | 2019 | Observations |
|----------|--------|--|-------------|--------|-------|---|
| | | | unit | value | | |
| F | P07 | No. of documented learning interactions in finalised | Number | 50.00 | 53.00 | Learning interactions were at the core of the capacity building-leaning S.O.4.1., though most of them not as final aim of a given project as such but as intermediate steps to achieve broader policy-impact. As one |
| | | operations | | | | good practice the establishment of an Advisory Board for the economic inclusion of Roma communities through the project RARE can be mentioned. The advisory board was created to be the main engine to fuel |
| | | | | | | policy making on Roma labour market activation solution on DR and to inform EUSDR PA9 and PA10 through their respective Steering Groups and PA10 D-LAP working group. |
| S | P07 | No. of documented learning interactions in finalised | Number | 50.00 | 61.00 | As documented learning interactions is a mandatory indicator that all the projects have to contribute to, all 8 projects approved are developing outputs that are contributing to this output indicator (e.g. YOUMIG |
| | | operations | | | | project is implementing trainings for local governments on youth migration indicators and their adaptation for strategy planning & implementation on local level. The aim is to support local governments to better |
| | | | | | | understand the evidence base of youth migration in order to identify and measure the change of human/social/financial capital resulting from youth migration leading to better strategy planning). |
| F | P26 | Number of strategies for strengthening institutional | | 17.00 | 7.00 | |
| | | capacities and transnational multilevel governance | | | | EduLab elaborated a strategic framework (Danubian Charta for Young Talents) to offer a sustainable solution for the problem of brain drain and skill mismatch by developing a practice-oriented higher |
| <u> </u> | | developed and/or implemented | | | | education model that aligns education and training with the demands of the job market. YOUMIG created local developmental strategies based on improved impact indicators of youth migration. |
| S | P26 | Number of strategies for strengthening institutional | | 17.00 | 68.00 | All 8 projects approved are developing strategies for strengthening institutional capacities and transnational multilevel governance (e.g. Edu Lab project is developing "Danubian Charta for young talents" which |
| | | capacities and transnational multilevel governance | | | | |
| - | | developed and/or implemented | | | | will visualise the new Danubian governance model reflecting the common vision of the Danube Region in the labour market relevance of higher education). |
| F | P27 | | Number | 33.00 | 45.00 | Clearly the outstanding good practice under S.O.4.1 is an output developed by DRIM. The information platform DANUBE COMPASS is an innovative attempt to respond to the transnational challenges in the |
| | | capacities and supporting transnational multilevel | | | | field of migration with a transnational approach instead of national information infrastructures. The expected short-term impact is a better response of main target groups (local and national authorities) in |
| | P27 | governance developed and/or implemented | Number | 33.00 | 50.00 | supporting migrants' economic integration as well as migrants' – the secondary target group – easier access to employment and renewed trust in public authorities. |
| 18 | P27 | Number of tools for strengthening institutional capacities and supporting transnational multilevel | Number | 33.00 | 39.00 | All 8 projects approved are developing tools for strengthening institutional capacities and transnational multilevel governance (e.g. DRIM project is developing "DANUBE COMPASS info tool" which is a |
| | | governance developed and/or implemented | | | | transnational information platform for information dissemination in the field of migrants' economic integration (information regarding employment, labour market, work, skills enhancement and other areas of |
| | | governance developed and/or implemented | | | | translational monitation platform for information dissemination in the field of infigrants economic integration (information regarding employment, tatoour market, work, skins eminatement and other areas of integration). |
| E | P28 | Number of pilot actions for strengthening institutional | Number | 17 00 | 5 00 | Integration). The development and implementation of six action plans of participatory peri-urban agriculture have been the core issue of pilot actions carried out by the project AgriGo4Cities. The main aim was to test a |
| 1. | 1 20 | capacities and supporting transnational multilevel | rumber | 17.00 | 3.00 | common methodology in the field concerned and to enable public administrators to capitalize their knowledge gained in a transnational learning environment. Communities at risk of exclusion were able to stress |
| | | governance developed and/or implemented | | | | and follow their ideas by working on the local participatory peri-urban agriculture projects. The pilot actions contributed to the socio-economic integration and a better urban environment in the locations. |
| | | governance developed und/or implemented | | | | concerned. |
| S | P28 | Number of pilot actions for strengthening institutional | Number | 17.00 | 22 00 | U |
| ١ | 1.20 | capacities and supporting transnational multilevel | | 17.00 | 22.00 | Out of the 8 approved projects, 6 are implementing pilot actions for strengthening institutional capacities and transnational multilevel governance (e.g. RARE 'Cooperation, capacity building, sensitisation |
| | | governance developed and/or implemented | | | | " |
| | | , | | | | pilots' which will strongly support the creation of more inclusive institutional attitude of stakeholders - policy makers, labour offices, educational institutions, NGOs, public services - working for Roma labour |
| | | | | | | market activation through cooperation and capacity building). |

3.3 Table 3: Information on the milestones and targets defined in the performance framework

| Priority | Ind | ID | Indicator | Measurement unit | Milestone for 2018 total | Final target (2023) total | 2019 | Observations |
|----------|-----|-----|--|---------------------|--------------------------|---------------------------|---------------|---|
| axis | F F | FI1 | Total amount of eligible expenditure certified to EC for priority axis 1 | EUR | 4,945,665.00 | 64,655,843.00 | 28,377,245.20 | |
| 1 | I | KIS | Number of documented learning interactions (in approved applications) | Number | 20 | 96.00 | 495.00 | |
| 1 | 0 | P07 | No. of documented learning interactions in finalised operations | Number | 0 | 96.00 | 262.00 | In 2019 all the 1st Call projects finalised their implementation of the activities. The data included in the performance framework is extracted from eMS system. However eMS is only calculating the outputs delivered only when the progress report is approved by the MA/JS, and a many of the 1st call projects had the progress report approved in 2020. Therefore the data included in the current report reflects only the outputs from the approved final progress reports. The data coming from the project which will have the progress report approved in 2020 will be included in the following AIR. |
| 1-MD | F | FI1 | Total amount of eligible expenditure certified to EC for priority axis 1 | EUR | 0 | 1,321,548.00 | 0.00 | |
| 1-UA | F | FI1 | Total amount of eligible expenditure certified to EC for priority axis 1 | EUR | 0 | 1,179,642.00 | 0.00 | |
| 2 | F | FI2 | Total amount of eligible expenditure certified to EC for priority axis 2 | EUR | 6,246,985.00 | 81,668,305.00 | 30,761,183.16 | |
| 2 | I | KIS | Number of documented learning interactions (in approved applications) | Number | 22 | 102.00 | 208.00 | |
| 2 | О | P07 | No. of documented learning interactions in finalised operations | Number | 0 | 102.00 | 96.00 | In 2019 all the 1st Call projects finalised their implementation of the activities. The data included in the performance framework is extracted from eMS system. However eMS is only calculating the outputs delivered only when the progress report is approved by the MA/JS, and a many of the 1st call projects had the progress report approved in 2020. Therefore the data included in the current report reflects only the outputs from the approved final progress reports. The data coming from the project which will have the progress report approved in 2020 will be included in the following AIR. |
| 2-MD | F | FI2 | Total amount of eligible expenditure certified to EC for priority axis 2 | EUR | 0 | 925,633.00 | 0.00 | |
| 2-UA | F | FI2 | Total amount of eligible expenditure certified to EC for priority axis 2 | EUR | 0 | 1,299,812.00 | 0.00 | |
| 3 | F | FI3 | Total amount of eligible expenditure certified to EC for priority axis 3 | EUR | 3,937,435 | 51,475,016.00 | 27,470,214.35 | |
| 3 | I | KIS | Number of documented learning interactions (in approved applications) | Number | 14 | 64.00 | 80.00 | |
| 3 | 0 | P07 | No. of documented learning interactions in finalised operations | Number | 0 | 64.00 | 39.00 | In 2019 all the 1st Call projects finalised their implementation of the activities. The data included in the performance framework is extracted from eMS system. However eMS is only calculating the outputs delivered only when the progress report is approved by the MA/JS, and a many of the 1st call projects had the progress report approved in 2020. Therefore the data included in the current report reflects only the outputs from the approved final progress reports. The data coming from the project which will have the progress report approved in 2020 will be included in the following AIR. |
| 3-MD | F | FI3 | Total amount of eligible expenditure certified to | EUR | 0 | 725,213.00 | 0.00 | |

| Priority | Ind | ID | Indicator | Measurement | Milestone for | Final target | 2019 | Observations |

Where applicable, the use of any contribution from third countries participating in the cooperation programme should be provided (for example IPA and ENI, Norway, Switzerland)

In accordance with the Preamble (37) of the ETC Regulation, third countries are allowed to participate through contribution of IPA and ENI resources in transnational cooperation programmes in order to strengthen the Union's economic, social and territorial cohesion and to reinforce effectiveness of its cohesion policy. In order to ensure effective participation of non-EU member countries in the DTP, managed in accordance with the shared management principle, programme implementation conditions governing the financial management as well as programming, monitoring, evaluation and control of the participation of third countries as set out in the present CP as well as in the financing agreements shall be respected by all participating countries in line with Article 26 of the ETC Regulation.

IPA funds are integrated into the programme management system in order to provide the same possibilities to and assume the same liabilities by beneficiaries from both the Member States and the IPA beneficiary countries. The single implementation system gives the possibility to fully integrate external partners into the transnational partnerships, thus the whole project can be managed by one single contract under the responsibility of the Lead Beneficiary. Detailed rules regarding the management of the integration of IPA funds will be covered by Financing Agreements.

Based on the result of the designation audit on compliance the management and control system (of the Audit Authority) of Moldova, with unqualified opinion, the MA/ JS provided access to the eMS to the ENI-MD controllers and they started to validate the expenditure reported by the ENI-MD project partners. Out of the 4 corrective measures needed, the MD authorities reported 2 fulfilled in 2019.

The designation audit for Ukraine resulted with qualified opinion, meaning that the national control system is not established yet and corrective measures needs to be fulfilled. Fulfillment of the corrective measures will be audited in 2020 with the involvement of the GoA members in 2020.

Table 5: Breakdown of the cumulative financial data by category of intervention

As set out in Table 2 of Annex II to Commission Implementing Regulation (EU) No 1011/2014 (Model for transmission of financial data) and tables 6-9 of Model for cooperation programmes

| Priority axis | Fund | Intervention field | Form of finance | Territorial dimension | Territorial delivery mechanism | Thematic objective dimension | ESF secondary theme | Economic dimension | Location dimension | Total eligible cost of operations selected for support | Public eligible cost of operations selected for support | The total eligible expenditure declared by eneficiaries to the managing authority | Number of operations selected |

- (1) ERDF support is the Commission decision on the respective cooperation programme.
- (2) In accordance with and subject to ceilings set out Article 20 of Regulation (EU) No 1299/2013.

4. SYNTHESIS OF THE EVALUATIONS

No programme evaluation was conducted during 2019. However the recommendations of the Operational Evaluation (already reported in 2018 AIR) have been implemented by the MA/ JS and the ToRs for the Impact Evaluation have been finalised and endorsed by the MC. The impact evaluation tender will be launched in the following year.

| | Name | Fund | From month | From year | To month | To year | Type of evaluation | Thematic objective | Topic | Findings |
|--|------|------|------------|-----------|----------|---------|--------------------|--------------------|-------|----------|
|--|------|------|------------|-----------|----------|---------|--------------------|--------------------|-------|----------|

5. ISSUES AFFECTING THE PERFORMANCE OF THE PROGRAMME AND MEASURES TAKEN

(a) Issues which affect the performance of the programme and the measures taken

By the deadline of 15 February 2019, the "annual accounts" package prepared by the programme authorities in close cooperation (Audit Authority, Certifying Authority and MA/JS) had been submitted to the EC for the accounting year ended 30 June 2018. The annual accounts had been approved by the EC on 14 May 2019.

Based on the expenditure included in payment applications submitted to the European Commission in the course of the accounting year 01/07/2018-30/06/2019, the Audit Authority selected the sample of operations to be audited and sent it to the GoA members for consultation purposes. Altogether 61 project partners have been selected for audit in order to gain comprehensive feedback regarding the implementation of projects within the Programme. The audits on operations were carried out by the External Auditor (AESA Hungary Ltd) from 24 July 2019 to 27 September 2019. Final audits reports had been issued by December 2019, except for one report which had been closed on 8th January 2020. In the audited period 24 irregularities were revealed regarding 15 beneficiaries. The total amount of these irregularities is 69 372.80€ out of which the amount not to be recovered and repaid into the EU budget is 140.65€.

Based on the Verification Reports submitted by the Partner States within the deadline of 15 October, as well as the results of the system audits and audits of sampled operations carried out, the MA/JS prepared the draft management declaration and annual summary for the year 2019. The final documents had submitted to the AA in February 2020, after acceptance of the drafts by the AA.

The draft up-dated description of the management and control system had been prepared by the MA/JS at the end of 2019 and submitted in January 2020 to the Audit Authority, including the up-dated versions of the description of national control systems as annexes to the DMCS.

Open questions related to reporting of ENI expenditure towards the EC had been discussed via videoconference in February 2019.

Based on the result of the designation audit on compliance the management and control system (of the Audit Authority) of Moldova, with unqualified opinion, the MA/ JS provided access to the eMS to the ENI-MD controllers and they started to validate the expenditure reported by the ENI-MD project partners. Out of the 4 corrective measures needed, the MD authorities reported 2 fulfilled in 2019.

The designation audit for Ukraine resulted with qualified opinion, meaning that the national control system is not established yet and corrective measures needs to be fulfilled. Fulfilment of the corrective measures will be audited in 2020 with the involvement of the GoA members in 2020.

EN 47 EN

(b) OPTIONAL FOR LIGHT REPORTS, otherwise it will be included in point 9.1. An assessment of whether progress made towards targets is sufficient to ensure their fulfilment, indicating any remedial actions taken or planned, where appropriate.

Danube Transnational Programme is in line with its targets from both financial, but also content point of view. Based on an analysis of the MA/ JS, the experience of the second call for proposals showed that, on one hand, stakeholders try to apply with topics that are not well fitting the DTP and, on the other hand, those who apply with a relevant topic need further support in structuring their proposal into the programme requirements. The DTP area is in fact composed by relevant stakeholders who are not experienced in ETC project designing and management. Therefore it was decided that the third call for proposal should have a dual approach: an open call but with stronger support from the programme side. Following a detailed analysis of the topics covered by the approved projects, the MC decided to restrict SO1.1, 1.2, 2.1 and 3.1 (SO 1.1 restricted to Service innovation, with a focus on strengthening employment via innovative public policies and creative industries (with a strong accent on innovative urban regeneration via service hubs; SO 1.2 restricted to strengthening the capacity of the so-called support organisations (e.g. employment agencies, trade unions, labour market organisations), social services able to better meet social needs and to provide services in general interest and improve the capacity of public administration to better cope with innovation processes (accent on national and regional public administrations; SO 2.1 restricted to water quality management, e.g. integrated policies, strategies, solutions, measures to reduce nutrient and hazardous substance pollution, improving quality of (surface and ground) waters in the Danube and its transnationally relevant (sub-)River Basin(s) - while monitoring is not expected to be in the main focus of such projects; more efficient waste water treatment solutions that can prove transnational impact; Integrated ground water resources management (from quality and / or quantity aspect) can also be potential topic, in case the transnational relevance and approach can reasonably be proved by a project; managing water resources from quantitative aspects (balanced usage, inter-sectorial coordination and cooperation) having transnational impact on water bodies can also be considered as possible project topic; strategic approach in harmonised and coordinated operative flood prevention measures (e.g. inter-sectorial coordination, including hydropower, navigation, etc.) for transnationally relevant river (basins); SO 3.1 restricted to transport corridors crossing the Danube region (e.g. addressing identified missing links, proposing solutions for improvement including [cross-border] traffic management systems, developing actions plans/ feasibility plans aimed at further developing the transport corridors – considering the pre-identified projects or their development status); cycling routes crossing the Danube region (e.g. identifying missing links, proposing solutions for improvement, developing actions plans/ feasibility plans aimed at further developing the routes); inter- and multi-modality, including development of ports' connections to road and rail transport for the improvement of transport chains). The DTP portfolio of projects will be completed with the approval of the 3rd call in 2020.

6. CITIZEN'S SUMMARY (ARTICLE 50(9) OF REGULATION (EU) NO 1303/2013)

A citizen's summary of the contents of the annual and the final implementation reports shall be made public and uploaded as a separate file in the form of annex to the annual and the final implementation report

You can upload/find the Citizen's summary under General > Documents

7. REPORT ON THE IMPLEMENTATION OF FINANCIAL INSTRUMENTS (ARTICLE 46 of Regulation (EU) No 1303/2013)

8. PROGRESS IN PREPARATION AND IMPLEMENTATION OF MAJOR PROJECTS AND JOINT ACTION PLANS (ARTICLE 101(H) AND ARTICLE 111(3) OF REGULATION (EU) NO 1303/2013 AND ARTICLE 14(3)(B) OF REGULATION (EU) NO 1299/2013)

9.2. Specific actions taken to promote equality between men and women and to promote non-discrimination, in particular accessibility for persons with disabilities, and the arrangements implemented to ensure the integration of the gender perspective in the cooperation programme and operations (Article 50(4) of Regulation (EU) No 1303/2013 and Article 14(4), subparagraph 2, (d) of Regulation (EU) No 1299/2013)

An assessment of the implementation of specific actions to take into account the principles set out in Article 7 of Regulation (EU) No 1303/2013 on promotion of equality between men and women and non-discrimination, including, where relevant, depending on the content and objectives of the cooperation programme, an overview of specific actions taken to promote equality between men and women and to promote non-discrimination, including accessibility for persons with disabilities, and the arrangements implemented to ensure the integration of the gender perspective in the cooperation programme and operations

9.3. Sustainable development (Article 50(4) of Regulation (EU) No 1303/2013 and Article 14(4), subparagraph 2, (e) of Regulation (EU) No 1299/2013)

An assessment of the implementation of actions to take into account the principles set out in Article 8 of Regulation (EU) No 1303/2013 on sustainable development, including, where relevant, depending on the content and objectives of the cooperation programme, an overview of the actions taken to promote sustainable development in accordance with that Article

9.4. Reporting on support used for climate change objectives (Article 50(4) of Regulation (EU) No 1303/2013)

Calculated amount of support to be used for climate change objectives based on the cumulative financial data by category of intervention in Table 7

| Priority | Amount of support to be used for climate | 1 - |
|----------|--|---------------------------|
| axis | change objectives (EUR) | operational programme (%) |
| 1 | 3,347,204.88 | 6.09% |
| 2 | 13,298,232.82 | 19.16% |
| 3 | 15,496,827.71 | 35.42% |
| Total | 32,142,265.42 | 13.86% |

9.5 Role of partners in the implementation of the cooperation programme (Article 50(4) of Regulation (EU) No 1303/2013 and Article 14(4), subparagraph 1, (c) of Regulation (EU) No 1299/2013)

Assessment of the implementation of actions to take into account the role of partners referred to in Article 5 of Regulation (EU) No 1303/2013, including involvement of the partners in the implementation, monitoring and evaluation of the cooperation programme

| 10. OBLIGATORY | INFORMATION AN | D ASSESSMENT | ACCORDING TO | O ARTICLE 14(4), |

10.2 The results of the information and publicity measures of the Funds carried out under the communication strategy

- 11. ADDITIONAL INFORMATION WHICH MAY BE ADDED DEPENDING ON THE CONTENT AND OBJECTIVES OF THE COOPERATION PROGRAMME (ARTICLE 14(4), SUBPARAGRAPH 2 (A), (B), (C) AND (F), OF REGULATION (EU) NO 1299/2013)
- 11.1. Progress in the implementation of the integrated approach to territorial development, including integrated territorial investments, sustainable urban development, and community led local development under the cooperation programme

11.2 Progress in implementation of actions to reinforce the capacity of authorities and beneficiaries to administer and to use the ERDF

11.3 Contribution to macro-regional and sea basin strategies (where appropriate)

As stipulated by the Regulation (EU) No 1299/2013, recital 19, article 8(3)(d) on the "Content, adoption and amendment of cooperation programmes" and article 14(4) 2nd subparagraph (c) "Implementation reports", this programme contributes to MRS(s) and/or SBS:

The Danube Transnational Programme offers support for the EUSDR implementation, for example by financing projects directly supporting the EUSDR (as per assessment criteria defined jointly by the Programme and the Strategy) and their preparation (Seed Money Facility). Consequently the EUSDR PACs were actively involved in the projects by participating either as financing partners, or as ASPs or leading the capitalisation poles of the programme.

In addition, as mentioned above, in this period the Programme provides direct support to the coordination activities of macro-regional cooperation:

- Support to Priority Areas Coordinators aimed at increasing the effectiveness of coordination and strategy implementation in each of the Priority Areas of the EUSDR
- Seed Money Facility providing support for preparation of complex strategic transnational projects contributing to the EUSDR, to be further financed by different funding sources existing in the region
- Establishment and support of the EUSDR Strategy Point aimed at facilitating the information flow between EUSDR actors, as well as strengthening the capacity of the PAC in implementing and communicating the Strategy.

By the end of 2019 all the 3 funding schemes planned in the Cooperation Programme were on-going. The 1st EUSDR PAC call implementation finalysed in december 2019, DTP financing all the 12 priorities of the EUSDR. The second PAC call was planned to be launched on the 24th of June 2019 with a deadline on 24th of September 2019, but due to the late receipt of the list of eligible PAC institutions from the EC/EUSDR, the call was finally officially launched on the 6th August and closed on the 8th October 2019. All 12 Priority Areas successfully submitted the proposals through the eMS system. Following the assessment, 11 proposals were approved with conditions to be fulfilled (the deadline being set to 24th of January 2020). Due to the low quality of the content, one proposal was invited to be re-submitted by February 2020.

The SMF projects submitted in March their interim report. Few projects completed their work before the standard 12-month implementation period and majority finalised the implementation by the end of August. Their final report has been submitted in December 2019, even though due to delays from the controllers' side, majority of them missed many certificates. Financial closure of the SMF projects is expected in the first months of 2020.

The DSP project submitted its first PPR in June and despite the expected inclusion of the Croatian EUSDR Presidency institution in the project, this modification request started only in the second half of 2019 and therefore not completed by the end of the year.

In 2019, the MA/JS continued its strong cooperation with the EUSDR. An active participation in the "statutory meetings" of the EUSDR was ensured: NC meetings (in February, Bucharest and in November, Zagreb), NC-PAC meeting (in May, Bucharest). The MA/JS provided comprehensive information in the form of a PPT for the PAC meeting held in January 2019 in Bucharest. In the last 2019 NC meeting held in Zagreb under the Croatian Presidency, the MA/JS has been invited to take active part in the newly created task Force on embedding that is expected to start its work in 2020.

Further to these meetings, the MA/JS attended also the *DANUVAL Working Group* meeting in March, Vienna and the *NC AND PAC Workshop on the Revision of the EUSDR Action Plan* in September, Vienna.

EN

D. Obtained results in relation to the EUSDR (n.a. for 2016)

EN

The programme successfully supports the all the 12 EUSDR PACs which started the implementation of their projects in January 2017 and finalised their implementation in December 2019. 19 SMF projects have been implemented addressing specific strategic topics identified by the PACs. Furthermore the new DSP was selected in 2018 and started the implementation of the activities.

E. Does the programme contribute to the targets as validated by the national coordinators and priority area coordinators in 2016 (uploaded on the EUSDR website)? (Please specify the target(s))

In case of DTP the projects are contributing to the EUSDR targets and each project is requested to describe already in the application phase to which targets they are contributing to and how (e.g. Danube Sediment contribute to the next Danube River Basin Management Plan (2021).

13. SMART, SUSTAINABLE AND INCLUSIVE GROWTH

Information and assessment of the programme contribution to achieving the Union strategy for smart, sustainable and inclusive growth.

14. ISSUES AFFECTING THE PERFORMANCE OF THE PROGRAMME AND MEASURES TAKEN — PERFORMANCE FRAMEWORK (ARTICLE 50(2) OF REGULATION (EU) NO 1303/2013)

Where the assessment of progress made with regard to the milestones and targets set out in the performance framework demonstrates that certain milestones and targets have not been achieved, Member States should outline the underlying reasons for failure to achieve these milestones in the report of 2019 (for milestones) and in the final implementation report (for targets).

| Warning 2.52.1 | In table 2, the annual total value entered is 350.00% of the total target value for "S", priority axis: 3, investment priority: 7c, indicator: P20, year: 2019. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 362.50% of the total target value for "S", priority axis: 2, investment priority: 6d, indicator: P15, year: 2018. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 362.50% of the total target value for "S", priority axis: 2, investment priority: 6d, indicator: P15, year: 2019. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 400.00% of the total target value for "S", priority axis: 2, investment priority: 6c, indicator: P12, year: 2017. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 400.00% of the total target value for "S", priority axis: 3, investment priority: 7c, indicator: P22, year: 2017. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 400.00% of the total target value for "S", priority axis: 4, investment priority: 11a, indicator: P26, year: 2017. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 400.00% of the total target value for "S", priority axis: 4, investment priority: 11a, indicator: P26, year: 2018. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 400.00% of the total target value for "S", priority axis: 4, investment priority: 11a, indicator: P26, year: 2019. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 437.50% of the total target value for "S", priority axis: 1, investment priority: 1b, indicator: P07, year: 2017. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 437.50% of the total target value for "S", priority axis: 2, investment priority: 6d, indicator: P16, year: 2017. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 456.25% of the total target value for "S", priority axis: 3, investment priority: 7c, indicator: P22, year: 2018. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 456.25% of the total target value for "S", priority axis: 3, investment priority: 7c, indicator: P22, year: 2019. Please check. |
| Warning 2.52.1 | In table 2, the annual total value entered is 510.34% of the total target value for "S", priority axis: 2, investment priority: 6c, indicator: P12, year: 2018. Please check. |

| Severity | Code | Message |
|----------|--------|---|
| Warning | 2.52.1 | In table 2, the annual total value entered is 510.34% of the total target value for "S", priority axis: 2, investment priority: 6c, indicator: P12, year: 2019. Please check. |
| Warning | 2.52.1 | In table 2, the annual total value entered is 515.63% of the total target value for "S", priority axis: 1, investment priority: 1b, indicator: P07, year: 2018. Please check. |
| Warning | 2.52.1 | In table 2, the annual total value entered is 515.63% of the total target value for "S", priority axis: 1, investment priority: 1b, indicator: P07, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 676.47% of the total target value for "S", priority axis: 1, investment priority: 1b, indicator: P03, year: 2017. Please check. |
| Warning | 2.52.1 | In table 2, the annual total value entered is 723.53% of the total target value for "S", priority axis: 1, investment priority: 1b, indicator: P03, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 723.53% of the total target value for "S", priority axis: 1, investment priority: 1b, indicator: P03, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 725.00% of the total target value for "S", priority axis: 2, investment priority: 6d, indicator: P16, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 725.00% of the total target value for "S", priority axis: 2, investment priority: 6d, indicator: P16, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 103.33% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P05, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 106.00% of the total target value for "F", priority axis: 4, investment priority: 11a, indicator: P07, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 115.15% of the total target value for "F", priority axis: 4, investment priority: 11a, indicator: P27, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 116.28% of the total target value for "F", priority axis: 2, investment priority: 6c, indicator: P07, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 118.75% of the total target value for "F", priority axis: 3, investment priority: 7c, indicator: P22, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 120.00% of the total target value for "F", priority axis: 3, investment priority: 7e, indicator: P25, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 120.69% of the total target value for "F", priority axis: 2, investment priority: 6c, indicator: P12, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 136.36% of the total target value for "F", priority axis: 4, investment priority: 11a, indicator: P27, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 140.00% of the total target value for "F", priority axis: 5, investment priority: -, indicator: P5.3, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 141.67% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P07, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 158.82% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P01, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 170.00% of the total target value for "F", priority axis: 5, investment priority: -, indicator: P5.3, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 187.50% of the total target value for "F", priority axis: 3, investment priority: 7c, indicator: P20, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 188.24% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P02, year: 2018. Please check. |
| Warning | | In table 2, the annual total value entered is 200.00% of the total target value for "F", priority axis: 2, investment priority: 6c, indicator: P07, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 200.00% of the total target value for "F", priority axis: 2, investment priority: 6d, indicator: P16, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 212.50% of the total target value for "F", priority axis: 3, investment priority: 7c, indicator: P21, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 235.29% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P03, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 241.18% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P01, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 247.06% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P02, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered is 272.92% of the total target value for "F", priority axis: 1, investment priority: 1b, indicator: P07, year: 2019. Please check. |
| Warning | | In table 2, the annual total value entered for "F" (implemented) is 140.00% of the annual total value entered for "S" (forecast from selected) for priority axis: 5, investment priority: -, indicator: P5.3, year: 2018. Please check. |
| Warning | 2.54.1 | In table 2, the annual total value entered for "F" (implemented) is 170.00% of the annual total value entered for "S" (forecast from selected) for priority axis: 5, investment priority: -, indicator: P5.3, year: 2019. Please check. |
