

Transnational Expert Panel

TEP is set-up with the aim of validating the quality, relevance, and impact of the project phases and deliverables. It is comprised of project-non-affiliated experts from different transport-related areas with emphasis on different aspects of electro mobility, each project partner is liable to appoint one member under coordination of University of Maribor. TEP and Steering Committee work close together and adopt a monitoring and evaluation system in order to ensure high quality of project's outputs. TEP ensures access to electro-mobility expertise, solutions and competences for participating pilot cities and partners.

TEP members participate at their national RSP meetings in order to allow for a full and coherent presentation of state-of-the-art expert knowledge and know-how (and also the integration thereof into our outputs) to the RSP members as well.
